|                        | Thinner  | International GTA713 (or Do not thin more than allowed by local<br>International GTA733 or environmental legislation<br>International GTA056)  |   |   |  |  |  |
|                        | Cleaner  | International GTA713 or (International GTA733 or International GTA056)   |   |   |  |  |  |
|                        | Work Stoppages   | Do not allow material to remain in hoses, gun or spray equipment.<br>Thoroughly flush all equipment with International GTA713. Once units of<br>paint have been mixed they should not be resealed and it is advised that<br>after prolonged stoppages work recommences with freshly mixed units.   |   |   |  |  |  |
|                        | Clean Up   | Clean all equipment immediately after use with International GTA713. It is<br>good working practice to periodically flush out spray equipment during the<br>course of the working day. Frequency of cleaning will depend upon amount<br>sprayed, temperature and elapsed time, including any delays.   |   |   |  |  |  |
|                        |  | All surplus materials and empty containers should be disposed of in accordance with appropriate regional regulations/legislation.  |   |   |  |  |  |
|                        |  |  |   |   |  |  |  |

# **KInternational**

# Interthane<sub>®</sub> 990S

## Polyurethane

PRODUCT CHARACTERISTICS Level of sheen and surface finish are dependent on application method. Avoid using a mixture of application methods whenever possible.

For brush and roller application, and in some colours, two or more coats of Interthane 990S may be required to give uniform coverage, especially when applying Interthane 990S over dark undercoats, and when using certain lead free bright colours such as yellows and oranges. Best practice is to use a colour compatible intermediate or anticorrosive coating under the Interthane 990S.

When overcoating after weathering or ageing, ensure the coating is fully cleaned to remove all surface contamination such as oil, grease, salt crystals and traffic fumes, before application of a further coat of Interthane 990S.

Absolute measured adhesion of topcoats to aged Interthane 990S is less than that to fresh material, however, it is adequate for the specified end use.

This product must only be thinned using the recommended International thinners.

Surface temperature must always be a minimum of 3°C (5°F) above dew point.

When applying Interthane 990S in confined spaces ensure adequate ventilation.

Condensation occurring during or immediately after application may result in a matt finish and an inferior film.

Premature exposure to ponding water will cause colour change, especially in dark colours and at low temperatures.

This product is not recommended for use in immersion conditions. When severe chemical or solvent splashing is likely to occur contact International Protective Coatings for information regarding suitability.

Note: VOC values are typical and are provided for guidance purpose only. These may be subject to variation depending on factors such as differences in colour and normal manufacturing tolerances.

SYSTEMS COMPATIBILITY The following primers/intermediates are recommended for Interthane 990S:

Intercure 200 Intercure 200HS Intercure 420 Intergard 251 Intergard 269 Intergard 345 Intergard 475HS Interseal 670HS Interzinc 315 Interzinc 52 Interzinc 52HS Interzone 1000 Interzone 505 Interzone 954

Interthane 990S should only be overcoated with itself.

For other suitable primers/intermediates/topcoats, consult International Protective Coatings.

ADDITIONAL INFORMATION Further information regarding industry standards, terms and abbreviations used in this data sheet can be found in the following documents available at www.international-pc.com:

- Definitions & Abbreviations
- Surface Preparation
- · Paint Application
- Theoretical & Practical Coverage

Individual copies of these information sections are available upon request.

SAFETY PRECAUTIONS This product is intended for use only by professional applicators in industrial situations in accordance with the advice given on this sheet, the Material Safety Data Sheet and the container(s), and should not be used without reference to the Material Safety Data Sheet (MSDS) which International Protective Coatings has provided to its customers.

All work involving the application and use of this product should be performed in compliance with all relevant national, Health, Safety & Environmental standards and regulations.

In the event welding or flame cutting is performed on metal coated with this product, dust and fumes will be emitted which will require the use of appropriate personal protective equipment and adequate local exhaust ventilation.

If in doubt regarding the suitability of use of this product, consult International Protective Coatings for further advice.

#### Warning: Contains isocyanate. Wear air-fed hood for spray application.
